This listing of claims will replace all prior versions, and listings, of claims in the application:

## **Listing of Claims:**

- 1. (Original) Use of silibinin, its salts and/or its pro-drugs with α-lipoic acid, its salts and/or its pro-drugs for the production of a medicine for the simultaneous, separate or timed cytoprotective treatment of chronically obstructive lung diseases.
- 2. (Original) Use according to claim 1, characterised in that the dose of the α-lipoic acid, its salts and/or its pro-drugs for administration to a human patient is between 30 and 1800 mg/d, preferably between 200 and 600 mg/d.
- 3. (Currently Amended) Use according to one of claims 1 or 2 Claim 1, characterised in that the dose of silibinin, its salts and/or its pro-drugs for administration to a human patient is between 20 and 1600 mg/d, preferably between 300 and 800 mg/d.
- 4. (Currently Amended) Use according to at least one of the preceding claims <u>Claim 1</u>, characterised in that the medicine can be administered by inhalation, orally or parenterally.
- 5. (Currently Amended) Use according to at least one of the preceding claims Claim 1, characterised in that the medicine contains further additives selected from the group of aqueous solvents, stabilisers, suspending, dispersing and wetting agents.
- 6. (Currently Amended) Use according to at least one of the preceding claims Claim 1, characterised in that the medicine is presented in the form of an aerosol, a solution, granules, a powder, an emulsion, a tablet and/or a film tablet.
- 7. (Currently Amended) Use according to at least one of the preceding claims Claim 1, characterised in that silibinin, its salts and/or its pro-drugs and the  $\alpha$ -lipoic acid, its salts and/or its pro-drugs are presented in a single formulation.
- 8. (Currently Amended) Use according to at least one of the preceding claims Claim 1, characterised in that silibinin, its salts and/or its pro-drugs and the  $\alpha$ -lipoic acid, its salts and/or its pro-drugs are presented in separate formulations.
